East Sussex
County Council

WARM MAPPING BY GP PRACTICE SUPPLEMENT

Annual Report of the Director of Public Health 2014-2015

Contents

1 How to read GP practice maps 4

2 GP Practice Maps: Hastings and Rother CCG 5

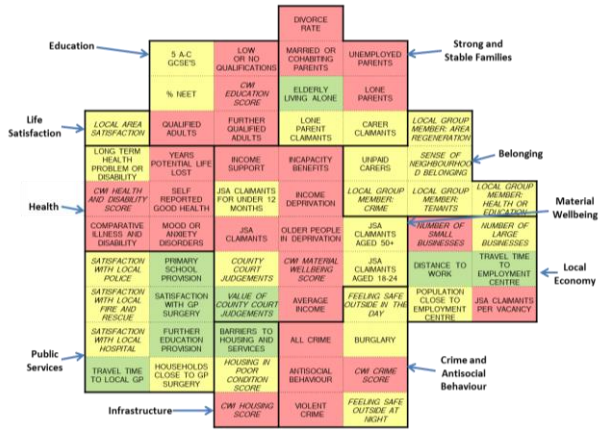
3 GP Practice Maps: Eastbourne, Hailsham and Seaford CCG 36

4 GP Practice Maps: High Weald Lewes Havens CCG 57

1) How to read the GP practice maps

The GP Practice maps use national and local data sources to present information on the 62 indicators of health and wellbeing which make up the ten components of the WARM tool: Life Satisfaction; Education; Health; Material Wellbeing; Strong and Stable families; Belonging; Local Economy; Public Services; Crime and Anti-Social Behaviour and Infrastructure. There are three sections to read for each of the GP practice maps:

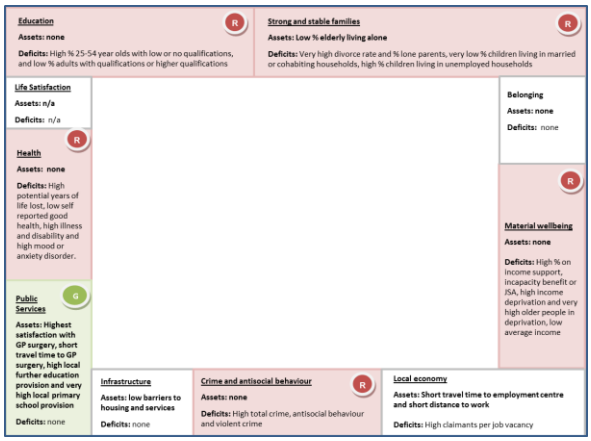
A) Indicator maps



These maps represent the 62 indicators for each GP practice and whether each is significantly better or worse than the East Sussex average. The indicators are grouped into those which make up each of the ten WARM components. Indicators written in italics represent those considered to be "weak" either due to quality or age of data. Overall domain scores have been weighted so that these indicators carry half the weight of stronger indicators.

B) Significantly different indicators and overall domain RAG rating

The boxes bordering the indicator map represent the overall RAG rating calculated for each of the WARM components for the GP practice. 'Red components' are where the majority of indicators are identified as deficits and 'Green components' are where the majority of indicators are identified as assets. 'Strong' indicators which are significantly better than the East Sussex average are outlined as "assets" within each component, and those which are significantly worse than average have been identified as "deficits" ("weak" indicators have been excluded)



C) Detailed description of all indicators within each domain

Component	Description
Life satisfaction	
Education	Worse than average 25-54 year olds with low or no qualifications, adults with qualifications at level 2 or above or level 4 or above, and educational scores in the CWI
Health	Worse than average potential years of life lost, health and disability score in CWI, self reported good health, comparative illness and disability, and mood or anxiety disorders in adults
Material wellbeing	Worse than average % on income support, incapacity benefits and JSA. Worse than average income deprivation, CWI material wellbeing scores and household income. Amongst ten worst practices for income deprivation affecting older people but better than average value of county court judgements
Strong and stable families	Amongst ten worst practices for % of people who are divorced, children living in married or cohabiting households and children living in lone parent households. Worse than average % children living in workless households. Better than average % elderly people living alone
Belonging	
Local economy	Better than average walking/public transport travel time to employment centre and distance travelled to work. Worse than average number of small local businesses and claimants per job vacancy
Public services	Best ranking practice for satisfaction with local GP surgery, better than average walking/public transport travel time to GP surgery and number of further education institutions within 30 mins walking/public transport, amongst ten best practices for primary schools within 15 mins by walking/ public transport
Crime and antisocial behaviour	Amongst then worst practices for crime score in CWI and worse than average all crime offences, antisocial behaviour and violent crime
Infrastructure	Better than average barriers to housing and services score but worse than average housing score in CWI

The text at the bottom of each page provides a detailed outline of the standings of all indicators which were significantly different to the East Sussex average, whether considered weak or strong.

Detailed explanation of the WARM tool and methodology is outlined in the main report.

2) WARM component ratings and identified assets and deficits for GP practices in Hastings and Rother CCG

The Plaza Surgery, H&R CCG

Education (R)

Assets: none

Deficits: Very high % 25-54 year olds with low or no qualifications and low % adults with qualifications or higher qualifications.

Strong and stable families (R)

Assets: Low % elderly living alone

Deficits: Very high divorce rate, % children living in unemployed households and % lone parents, very low % children in married/ cohabiting households

Life Satisfaction

Assets: n/a

Deficits: n/a

Health (R)

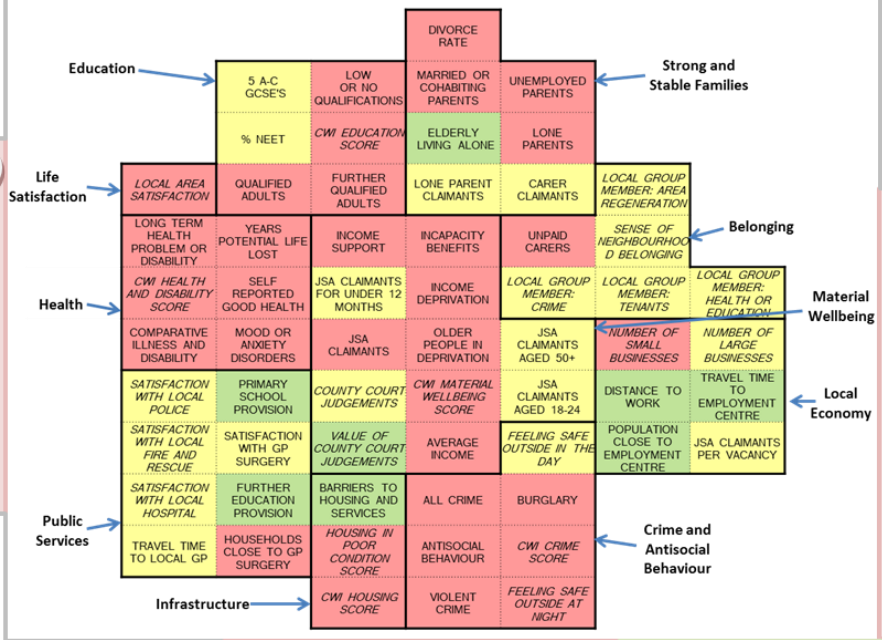
Assets: none

Deficits: High long term health problem or disability, very high potential years of life lost, very low self reported good health, very high illness and disability and very high mood or anxiety disorders

Public Services

Assets: very high local further education provision and high local primary school provision

Deficits: Low % close to GP surgery



Belonging

Assets: none

Deficits: very low % unpaid carers

Material wellbeing (R)

Assets: none

Deficits: Very high % on income support, incapacity benefit and JSA, very high income deprivation and older people in deprivation and very low average income

Infrastructure

Assets: low barriers to housing and services

Deficits: none

Crime and antisocial behaviour (R)

Assets: none

Deficits: Highest total crime, antisocial behaviour and violent crime and very high burglary

Local economy (G)

Assets: Short travel time to employment centre and high % close to employment centre. Short distance to work

Deficits: none

Component	Description
Life satisfaction	Fourth worst practice for satisfaction with local area
Education	Amongst ten worst practices for % 25-54 year olds with low or no qualifications, worse than average qualifications at level 2 or a at level 4 or above and fourth worst educational scores in the CWI
Health	Worse than average limiting long term health problem or disability, third worst practice for potential years of life lost, health and disability score in CWI and mood or anxiety disorders in adults. Amongst ten worst practices for self reported good health, and fifth worst for comparative illness and disability
Material wellbeing	Third worst practice for % on income support, and second worst for % on incapacity benefits or JSA. Third worst practiec for income deprivation, income deprivation affecting older people and CWI material wellbeing scores but amongst ten best practices for value of county court judgements. Amongst ten worst practices for average household income
Strong and stable families	Third worst practice for % of people who are divorced and % children living in workless households. Better than average elderly people living alone. Third worst practice for % children living in married or cohabiting households or in lone parent households
Belonging	Third worst practice for % unpaid carers
Local economy	Better than average walking/public transport travel time to employment centre and % of working age population within 20 mins of employment centre by walking/public transport or cycling. Worse than average number of small local businesses and amongst ten best practices for distance travelled to work
Public services	Worse than average % of households within 15 mins of GP surgery by walking/public transport. Fourth best practice for further education institutions within 30 mins walking/public transport and better than average primary schools within 15 mins by walking/public transport
Crime and antisocial behaviour	Third worst crime score in CWI and feeling of safety outside during the night. Worst ranking practice for all crime offences, antisocial behaviour and violent crime, and fifth worst for burglary
Infrastructure	Better than average barriers to housing and services score but second worst housing score in CWI and housing in poor condition score

Cornwallis Surgery, H&R CCG

Education

Assets: none

Deficits: Very high % 25-54 year olds with low or no qualifications and low % adults with qualifications or higher qualifications

R

Strong and stable families

Assets: Low % elderly living alone

Deficits: Very high divorce rate and % children living in unemployed households, very low % children in married/ cohabiting households and very high % lone parents

R

Life Satisfaction

Assets: n/a

Deficits: n/a

R

Health

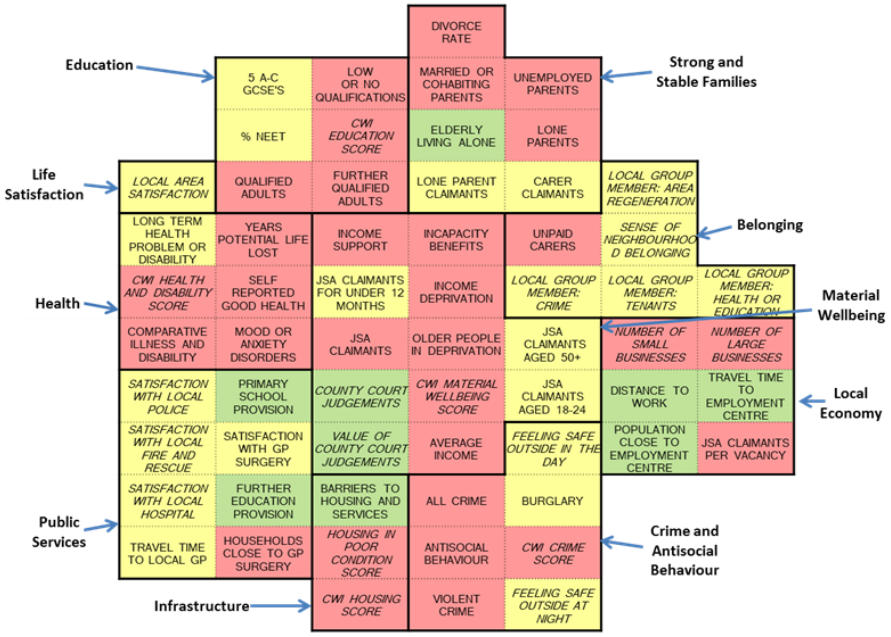
Assets: none

Deficits: Very high potential years of life lost, very low self reported good health, very high illness and disability and mood or anxiety disorders

Public Services

Assets: Very high local further education provision and high primary school provision

Deficits: low % close to GP surgery



Belonging

Assets: none

Deficits: very low % unpaid carers

R

Material wellbeing

Assets: none

Deficits: Very high % on income support, incapacity benefit or JSA. Very high income deprivation and older people in deprivation and very low average income

Infrastructure

Assets: low barriers to housing and services

Deficits: none

Crime and antisocial behaviour

R

Assets: none

Deficits: very high total crime, antisocial behaviour and violent crime

Local economy

G

Assets: Short distance to employment centre, very high % close to employment centre, very short distance to work

Deficits: Very high claimants per vacancy

Component	Description
Life satisfaction	
Education	Amongst ten worst practices for % 25-54 year olds with low or no qualifications. Worse than average qualifications at level 2 or above or at level 4 or above and amongst ten worst educational scores in the CWI
Health	Fourth worst practice for potential years of life lost and mood or anxiety disorder in adults, and amongst ten worst practices for health and disability score in CWI, self reported good health, and comparative illness and disability
Material wellbeing	Amongst ten worst practices for % on income support, and fourth worst for % on incapacity benefits or JSA. Amongst ten worst practices for income deprivation and second worst for income deprivation affecting older people. Fifth worst practice for CWI material wellbeing scores, but better than average number of county court judgements and third best practice for value of county court judgements. Amongst ten worst practices for average household income
Strong and stable families	Fourth worst practice for % of people who are divorced, children living in married or cohabiting households or in lone parent households, and fifth worst for children living in workless households. Better than average % elderly people living alone
Belonging	Fourth worst % unpaid carers
Local economy	Better than average walking/public transport travel time to employment centre and amongst ten best practices for % of working age population within 20 mins of employment centre by walking/public transport or cycling and for distanced travelled to work. Amongst ten worst practices for average number of small local businesses and worse than average number of large local businesses and claimants per job vacancy
Public services	Worse than average % of households within 15 mins of GP surgery by walking/public transport. Third best practice for further education institutions within 30 mins walking/public transport and better than average for primary schools within 15 mins by walking/public transport
Crime and antisocial behaviour	Fifth worst practice for crime score in CWI, and second worst for all crime offences, antisocial behaviour and violent crime
Infrastructure	Better than average barriers to housing and services score, but fourth worst housing score in CWI and third worst housing in poor condition score

Priory Road Surgery, H&R CCG

Education

Assets: none

Deficits: Very high % 25-54 year olds with low or no qualifications and very low % adults with qualifications or higher qualifications

Assets: Low % elderly living alone

Deficits: Very high divorce rate, highest % children living in unemployed households, very low % children in married/cohabiting households and very high % lone parents

R

Life Satisfaction

Assets: n/a

Deficits: n/a

R

Health

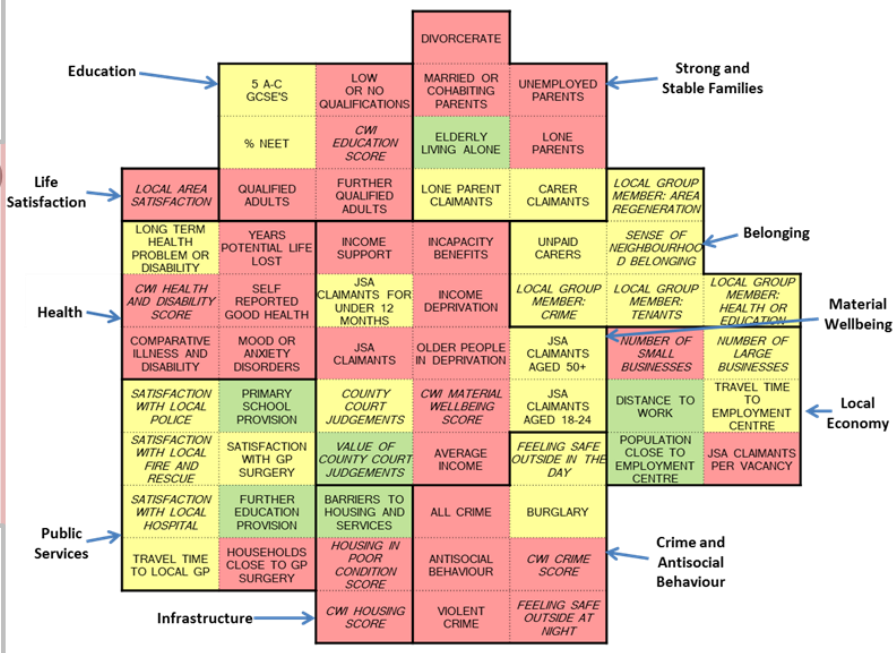
Assets: none

Deficits: Very high potential years of life lost, low self reported good health, very high illness and disability and very high mood or anxiety disorder

Public Services

Assets: Very high local further education and primary school provision

Deficits: Low % close to GP surgery



Belonging

Assets: none

Deficits: none

R

Material wellbeing

Assets: none

Deficits: Very high % on income support, incapacity benefits or JSA, very high income deprivation and older people in deprivation and very low average income

Infrastructure

Assets: Very low barriers to housing and services

Deficits: none

Crime and antisocial behaviour

R

Assets: none

Deficits: Very high total crime, antisocial behaviour and violent crime

Local economy

Assets: High % close to employment centre and short distance to work

Deficits: High claimants per job vacancy

Component	Description
Life satisfaction	Third worst practice for satisfaction with local area
Education	Fifth worst % 25-54 year olds with low or no qualifications, amongst ten worst practices for qualifications at level 2 or above or at level 4 or above and second worst for educational scores in the CWI
Health	Fifth worst practice for potential years of life lost, worst ranking practice for health and disability score in CWI, worse than average self reported good health, third worst practice for comparative illness and disability and fifth worst for mood or anxiety disorders in adults
Material wellbeing	Second worst practice for % on income support and for income deprivation and CWI material wellbeing scores, fifth worst for % on incapacity benefits or JSA, and for income deprivation affecting older people , and amongst ten worst practices for household income. Fifth best practice for value of county court judgements
Strong and stable families	Fifth worst % of people who are divorced, worst ranking practice for % children living in workless households, and second worst for children in married or cohabiting households or in lone parent households. Fifth best practice for elderly people living alone.
Belonging	
Local economy	Better than average % of working age population within 20 mins of employment centre by walking/public transport or cycling, amongst ten worst practices for number of small local businesses and worse than average claimants per job vacancy, but better than average distance travelled to work
Public services	Worse than average % of households within 15 mins of GP surgery by walking/public transport, second best practice for further education institutions within 30 mins walking/public transport and third best for primary schools within 15 mins by walking/public transport
Crime and antisocial behaviour	Worst ranking practice for crime score in CWI and feeling of safety outside during the night and third worst for all crime offences, antisocial behaviour and violent crime
Infrastructure	Amongst ten best practices for barriers to housing and services score, fifth worst housing score in CWI and worse than average housing in poor condition score

Component	Description
Life satisfaction	Amongst ten worst practices for satisfaction with local area
Education	Fourth worst practice for 25-54 year olds with low or no qualifications and worst for 16-18 year olds who are NEET. Worse than average % adults with qualifications at level 2 or above or at level 4 or above and third worst for educational scores in the CWI
Health	Amongst ten worst practices for limiting long term health problem or disability, worst ranking practice for potential years of life lost, comparative illness and disability and for mood or anxiety disorders in adults, fifth worst health and disability score in CWI and fourth worst practice for self reported good health
Material wellbeing	Worst ranking practice for % on income support, % on incapacity benefits, JSA claimants, income deprivation, income deprivation amongst older people, and CWI material wellbeing scores. Amongst ten best practices for JSA claimants aged 18-24. Fourth worst practice for number of county court judgements and for average household income
Strong and stable families	Worst ranking practice for % of people who are divorced and second worst for children living in workless households. Better than average % elderly people living alone. Worst ranking practice for % children living in married or cohabiting households or in lone parent households and for carer claimants
Belonging	Worst ranking practice for sense of neighbourhood belonging and for % unpaid carers
Local economy	Best ranking practice for walking/public transport travel time to employment centre and third best % of working age population within 20 mins of employment centre by walking/ public transport or cycling. Third worst practice for claimants per job vacancy but amongst ten best for distance travelled to work
Public services	Amongst ten best practices for walking/public transport travel time to GP surgery, better than average % of households within 15 mins of GP surgery by walking/public transport and amongst ten best practices for further education institutions within 30 mins walking/public transport
Crime and antisocial behaviour	Amongst ten worst practices for crime score in CWI, fourth worst for feeling of safety outside during the night and for antisocial behaviour, fifth worst for all crime offences and violent crime, and worse than average for burglary
Infrastructure	Better than average barriers to housing and services score but worst practice for housing score in CWI and housing in poor condition score

Life satisfaction	
Education	Worse than average 25-54 year olds with low or no qualifications, amongst ten worst practices for adults with qualifications at level 2 or above and third worst for qualifications at level 4 or above. Worse than average educational scores in the CWI
Health	Worse than average limiting long term health problem or disability and potential years of life lost. Fourth worst health and disability score in CWI, worse than average self reported good health and mood or anxiety disorders in adults and amongst ten worst practices for comparative illness and disability
Material wellbeing	Worse than average % on income support and amongst ten worst practices for % on incapacity benefits, worse than average % JSA claimants, income deprivation, income deprivation affecting older people and CWI material wellbeing scores
Strong and stable families	Worse than average % children living in workless households and in lone parent households. Amongst ten best practices for % elderly people living alone
Belonging	
Local economy	Amongst ten best practices for walking /public transport travel time to employment centre, % of working age population within 20 mins of employment centre by walking/public transport or cycling and distance travelled to work
Public services	Worse than average satisfaction with local GP surgery, better than average walking/public transport travel time to GP surgery and % of households within 15 mins of GP surgery by walking/ public transport/ Amongst ten best practices for further education institutions within 30 mins walking/public transport
Crime and antisocial behaviour	Worse than average crime score in CWI, feeling of safety outside during the night and all crime offences
Infrastructure	

Sedlescombe House Surgery, H&R CCG

Education (R)

Assets: none

Deficits: High 25-54 year olds with low or no qualifications, low % adults who are qualified or have higher qualifications

Strong and stable families

Assets: Low % elderly living alone

Deficits: High divorce rate, high % children living in unemployed households or in lone parent households.

Life Satisfaction

Assets: n/a

Deficits: n/a

Health (R)

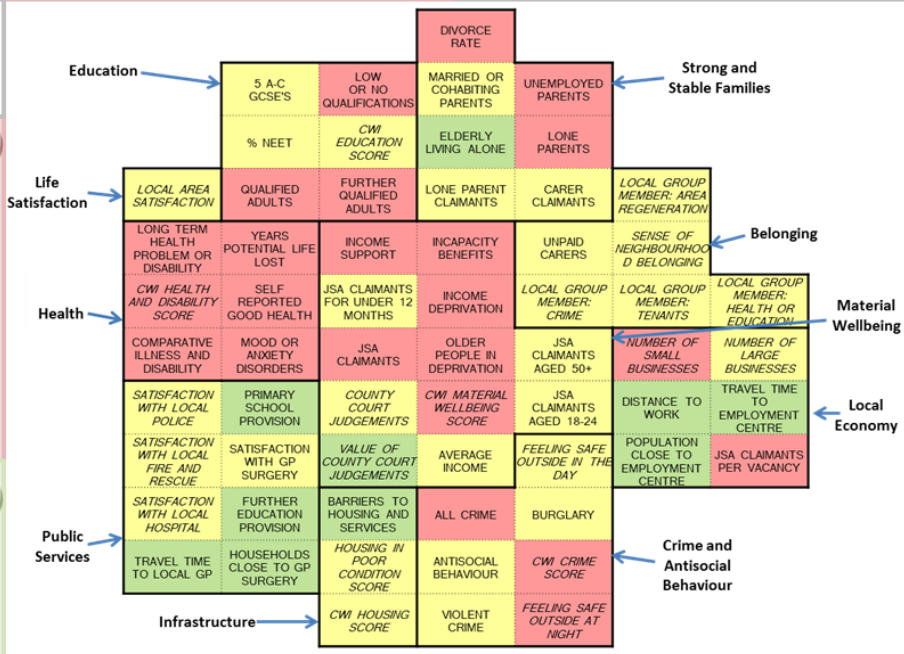
Assets: none

Deficits: High long term health problem or disability and low self reported good health. Very high potential years of life lost, illness and disability, and mood or anxiety disorders

Public Services (G)

Assets: Short travel time to GP surgery and high % close to GP surgery. Very high local further education provision and high local primary school provision

Deficits: none



Belonging

Assets: none

Deficits: none

Material wellbeing (R)

Assets: none

Deficits: Very high % on income support and incapacity benefits. High income deprivation, JSA claimants and older people in deprivation

Infrastructure (G)

Assets: Very low barriers to housing and services

Deficits: none

Crime and antisocial behaviour

Assets: none

Deficits: high total crime

Local economy (G)

Assets: Very short travel time to employment centre and very high % close to employment centre. Very short distance to work.

Deficits: high claimants per job vacancy

Component	Description
Life satisfaction	
Education	Worse than average 25-54 year olds with low or no qualifications, and adults with qualifications at level 2 or above or at level 4 or above
Health	Worse than average limiting long term health problem or disability, health and disability score in CWI and self reported good health. Amongst ten worst practices for potential years of life lost, comparative illness and disability and mood or anxiety disorders in adults
Material wellbeing	Amongst ten worst practices for % on income support and incapacity benefits. Worse than average income deprivation, JSA claimants, CWI material wellbeing scores, and income deprivation affecting older people. Better than average value of county court judgements
Strong and stable families	Worse than average % of people who are divorced children living in workless households or in lone parent households. Better than average % elderly people living alone.
Belonging	
Local economy	Amongst ten best practices for walking/public transport travel time to employment centre, fourth best for % of working age population within 20 mins of employment centre by walking/public transport or cycling and third best for distance travelled to work. Amongst ten worst practices for number of small local businesses and worse than average for claimants per job vacancy
Public services	Better than average walking/public transport travel time to GP surgery , % of households within 15 mins of GP surgery by walking/public transport and primary schools within 15 mins by walking/public transport. Amongst ten best practices for further education institutions within 30 mins walking /public transport
Crime and antisocial behaviour	Worse than average crime score in CWI and all crime offences. Amongst ten worst practices for feeling of safety outside during the night
Infrastructure	Amongst ten best practices for barriers to housing and services score

Component	Description
Life satisfaction	
Education	
Health	Second worst practice for limiting long term health problem or disability and third worst for self reported good health
Material wellbeing	Worse than average number of county court judgements and amongst ten worst practices for value of county court judgements. Worse than average household income
Strong and stable families	Second worst practice for % elderly people living alone but better than average for % children living in lone parent households
Belonging	Best ranking practice for % unpaid carers
Local economy	Better than average number of small and of large local businesses, and distance travelled to work
Public services	Worse than average further education institutions within 30 mins walking/ public transport and amongst ten worst practices for primary schools within 15 mins by walking/public transport
Crime and antisocial behaviour	Best ranking practice for crime score in CWI and better than average for all crime offences, antisocial behaviour and violent crime
Infrastructure	Amongst ten best practices for barriers to housing and services score

Ferry Road health Centre, H&R CCG
