East Sussex
County Council

WARM MAPPING BY WARD SUPPLEMENT

Annual Report of the Director of Public Health 2014-2015

Contents

1 How to read Ward maps 4

2 Ward Maps: Eastbourne Borough 5

3 Ward Maps: Hastings Borough 14

4 Ward Maps: Lewes District 30

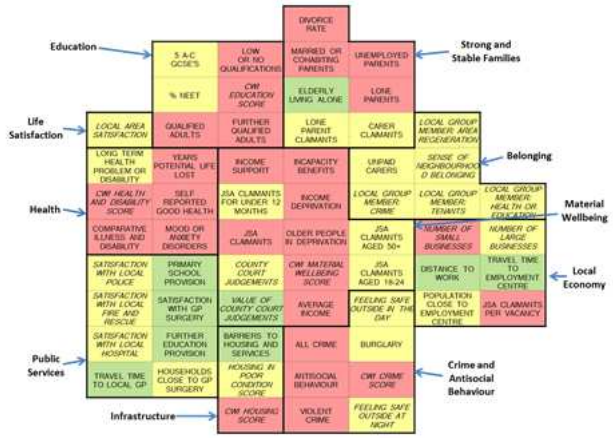
5 Ward Maps: Rother District 51

6 Ward Maps: Wealden District 71

How to read the Ward maps

The ward maps use national and local data sources to present information on the 62 indicators of health and wellbeing which make up the ten components of the WARM tool: Life Satisfaction; Education; Health; Material Wellbeing; Strong and Stable families; Belonging; Local Economy; Public Services; Crime and Anti-Social Behaviour and Infrastructure. There are three sections to read for each of the ward maps:

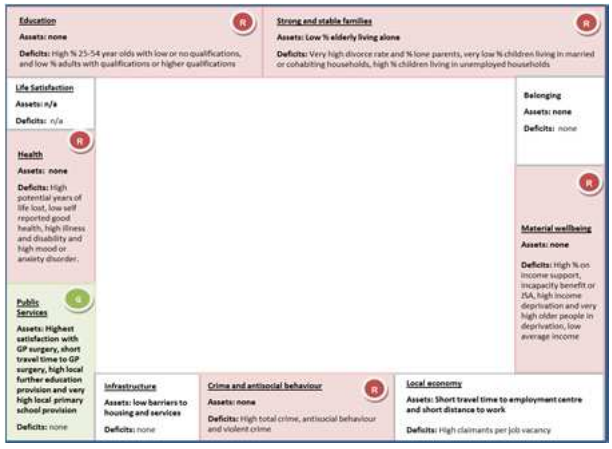
A) Indicator maps



These maps represent the 62 indicators for each ward and whether each is significantly better or worse than the East Sussex average. The indicators are grouped into those which make up each of the ten WARM components. Indicators written in italics represent those considered to be "weak" either due to quality or age of data. Overall domain scores have been weighted so that these indicators carry half the weight of stronger indicators.

B) Significantly different indicators and overall domain RAG rating

The boxes bordering the indicator map represent the overall RAG rating calculated for each of the WARM components for the GP practice. 'Red components' are where the majority of indicators are identified as deficits and 'Green components' are where the majority of indicators are identified as assets. 'Strong' indicators which are significantly better than the East Sussex average are outlined as "assets" within each component, and those which are significantly worse than average have been identified as "deficits" ("weak" indicators have been excluded)



C) Detailed description of all indicators within each domain

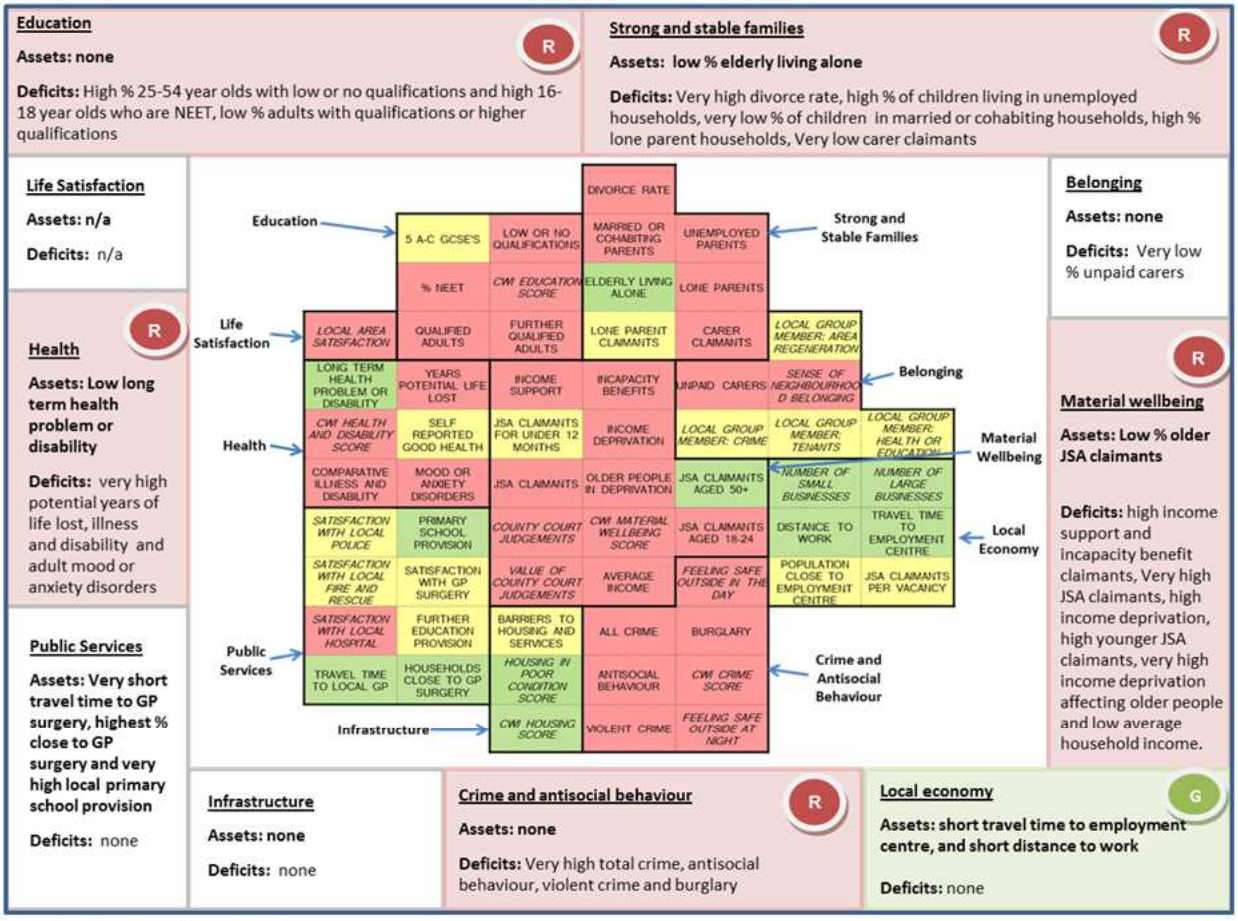
Component	Description
Life satisfaction	
Education	Worse than average 25-54 year olds with low or no qualifications, adults with qualifications at level 2 or above or level 4 or above, and educational scores in the CWI
Health	Worse than average potential years of life lost, health and disability score in CWI, self reported good health, comparative illness and disability, and mood or anxiety disorders in adults
Material wellbeing	Worse than average % on income support, incapacity benefits and JSA. Worse than average income deprivation, CWI material wellbeing scores and household income. Amongst ten worst practices for income deprivation affecting older people but better than average value of county court judgements
Strong and stable families	Amongst ten worst practices for % of people who are divorced, children living in married or cohabiting households and children living in lone parent households. Worse than average % children living in workless households. Better than average % elderly people living alone
Belonging	
Local economy	Better than average walking/public transport travel time to employment centre and distance travelled to work. Worse than average number of small local businesses and claimants per job vacancy
Public services	Best ranking practice for satisfaction with local GP surgery, better than average walking/public transport travel time to GP surgery and number of further education institutions within 30mins walking/public transport, amongst ten best practices for primary schools within 15 mins by walking/ public transport
Crime and antisocial behaviour	Amongst then worst practices for crime score in CWI and worse than average all crime offences, antisocial behaviour and violent crime
Infrastructure	Better than average barriers to housing and services score but worse than average housing score in CWI

The text at the bottom of each page provides a detailed outline of the standings of all indicators which were significantly different to the East Sussex average, whether considered weak or strong.

Detailed explanation of the WARM tool and methodology is outlined in the main report.

WARM component ratings and identified assets and deficits for wards in Eastbourne Borough

Eastbourne, Devonshire Ward



Component	Description
Life satisfaction	Amongst ten worst wards for satisfaction with local area
Education	Worse than average 25-54 year olds with low or no qualifications and 16-18 year olds who are NEET. Worse than average for qualifications at level 2 or above or at level 4 or above and worse than average educational scores in the CWI
Health	Better than average % of households with limiting long term health problem or disability. Third worst ward for years of potential life lost, worse than average health and disability score in CWI, amongst ten worst wards for comparative illness and disability, and for mood or anxiety disorders in adults.
Material wellbeing	Worse than average % on income support, or incapacity benefits and fifth worst ward for JSA claimants. Worse than average income deprivation. Better than average JSA claimants aged over 50 years but worse than average JSA claimants aged 18-24. Amongst ten worst wards for CWI material wellbeing scores and income deprivation affecting older people. Worst ranking ward for average number of county court judgements and amongst ten worst wards for value of county court judgements. Worse than average household income
Strong and stable families	Amongst ten worst wards for % of people who are divorced and worse than average % children living in workless households. Better than average % elderly people living alone. Amongst ten worst wards for children living in married or cohabiting households and worse than average children living in lone parent households. Amongst ten worst wards for carer claimants
Belonging	Second worst ward for sense of neighbourhood belonging, and for % unpaid carers
Local economy	Better than average walking/public transport travel time to employment centre, fifth best ward for number of small local businesses and third best for large local businesses, second best ward for distance travelled to work
Public services	Worse than average satisfaction with local hospital, amongst ten best wards for walking/public transport travel time to GP surgery and best ranking ward for % of households within 15 mins of GP surgery by walking/public transport. Amongst ten best wards for primary school within 15 mins by walking/public transport
Crime and antisocial behaviour	Worse than average crime score in CWI, third worst ward for feeling of safety outside during the day and worse than average feeling of safety outside during the night. Second worst ward for all crime offences, antisocial behaviour and violent crime rates and fifth worst for burglary
Infrastructure	Better than average housing score in CWI and housing in poor condition score

Hampden Park, Eastbourne

Education

Assets: none

Deficits: Low GCSE results, very high % 25-54 year olds with low or no qualifications, high % 16-18 year olds who are NEET, Very low % adults with qualifications or higher qualifications

R

Strong and stable families

Assets: Low % of elderly living alone

Deficits: Very high divorce rates, children living in unemployed households and lone parent households, low % children in married/ cohabiting households, high % of lone parent claimants

Deficits: n/a

Belonging

Assets: none

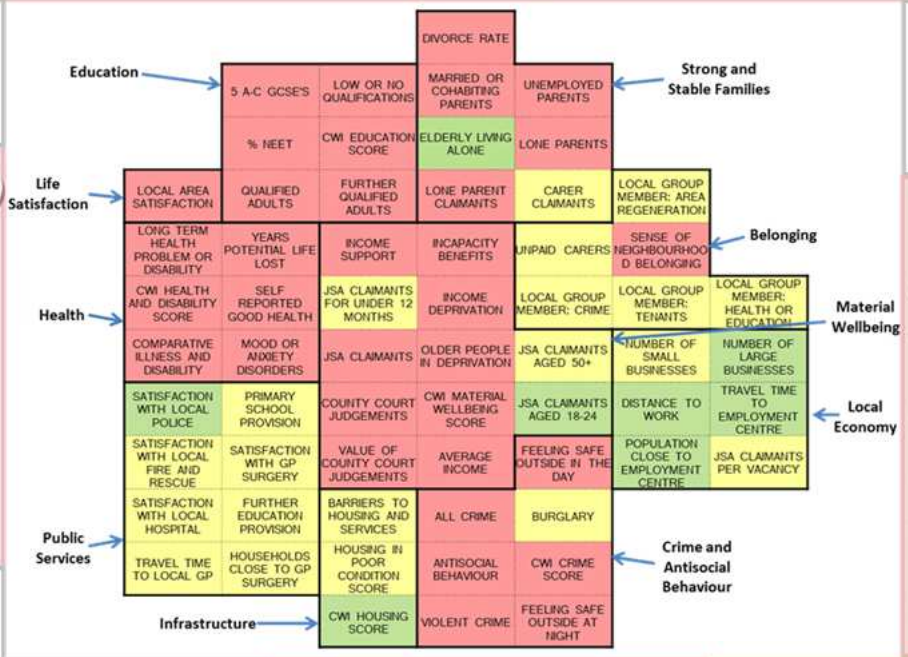
Deficits: none

Health

R

Assets: none

Deficits: high long-term health problems or disabilities, high potential years of life lost, low self reported health, high illness and disability, and high mood or anxiety disorders



R

Material wellbeing

Assets: low% younger JSA claimants

Deficits: Very high income support claimants, high incapacity benefit and JSA claimants, Very high income deprivation, high % of older people in deprivation, and low average income

Public Services

Assets: none

Deficits: none

Infrastructure

Assets: none

Deficits: none

Crime and antisocial behaviour

R

Assets: none

Deficits: High total crime, and very high antisocial behaviour and violent crime

Local economy

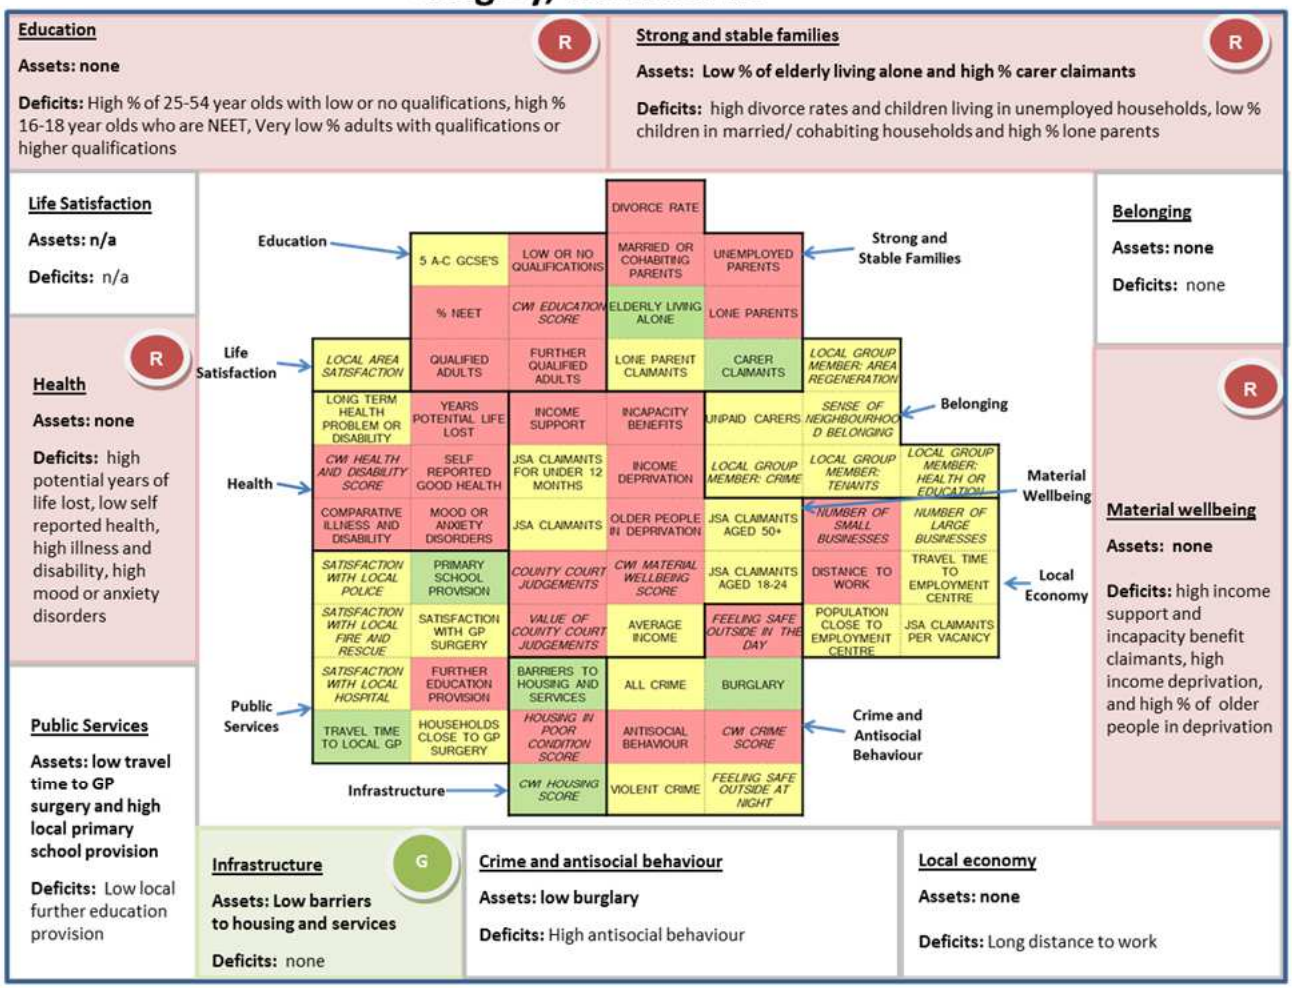
G

Assets: Very short travel time to employment centre, highest % close to employment centre, short distance to work

Deficits: none

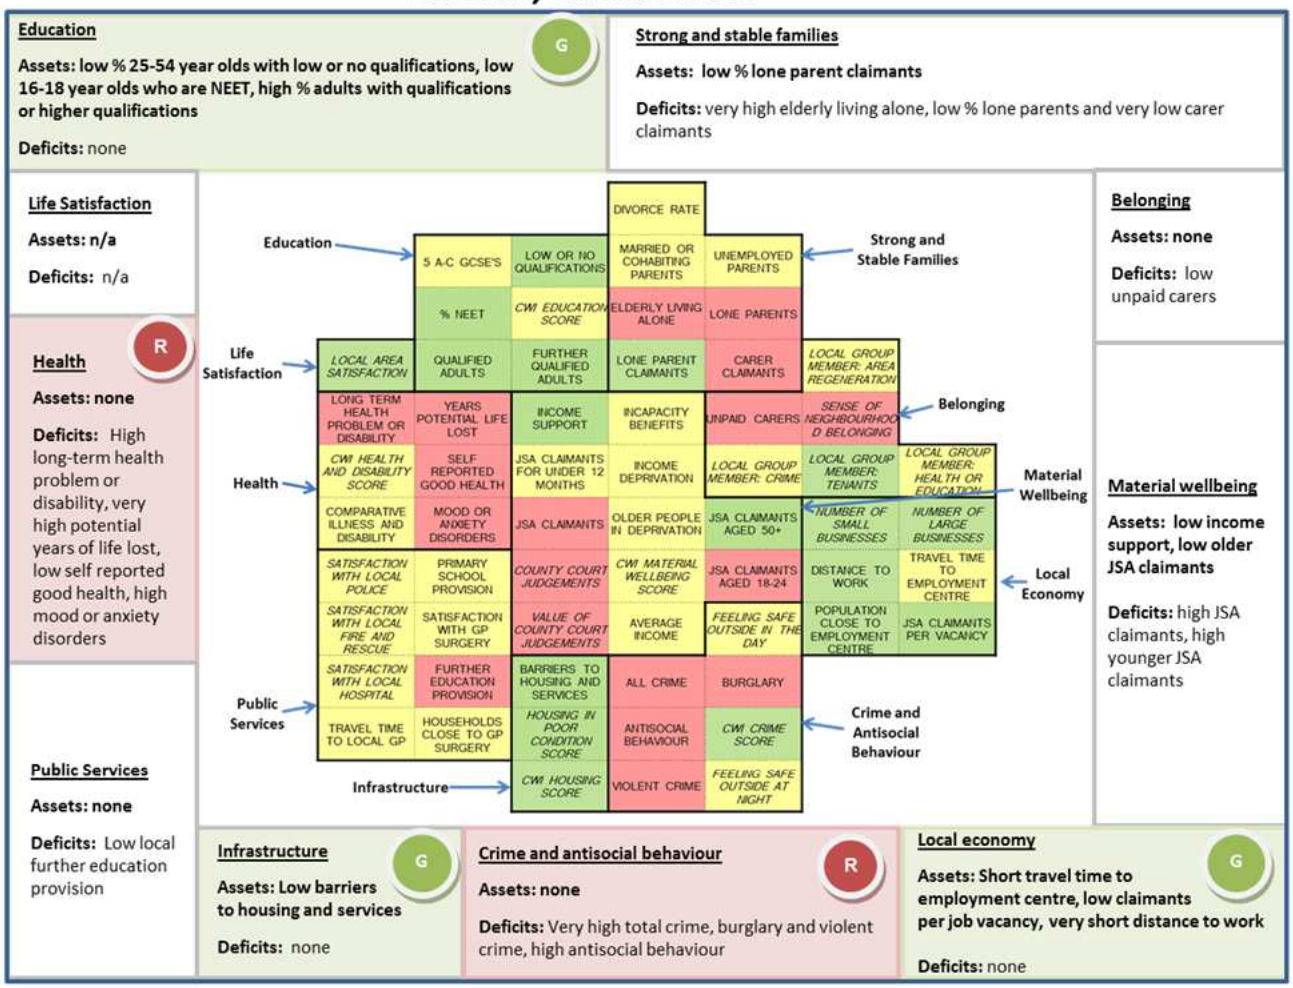
Component	Description
Life satisfaction	Worse than average satisfaction with local area
Education	Worse than average GCSE results, amongst worst ten wards for % of 25-54 year olds with low or no qualifications, worse than average 16-18 year olds who are NEET, fifth worst ward for working age qualifications at level 2 or above and fourth worst for qualifications at level 4 or above, amongst worst ten wards for educational scores in the CWI
Health	Worse than average limiting long term health problem or disability, and potential years of life lost, in worst ten wards for health and disability score in CWI, worse than average self reported good health, comparative illness and disability, and mood or anxiety disorders in adults
Material wellbeing	Amongst worst ten wards for % on income support, worse than average % on incapacity benefits, worse than average income deprivation and % JSA claimants. Better than average % JSA claimants aged 18-24, worse than average CWI material wellbeing scores and income deprivation affecting older people, third worst ward for number of county court judgements, worse than average value of county court judgements, and worse than average household income
Strong and stable families	In worst ten wards for % of people who are divorced and % children living in workless households, better than average % elderly people living alone. Worse than average % children living in married or cohabiting households, and amongst ten worst wards for lone parent households. Worse than average lone parent claimants.
Belonging	Amongst worst ten wards for sense of neighbourhood belonging
Local economy	Amongst ten best wards for walking/ public transport travel time to employment centre and best ranking ward for % of working age population within 20 mins of employment centre by walking/public transport or cycling. Better than average number of large local businesses and for distance travelled to work
Public services	Better than average satisfaction with local police
Crime and antisocial behaviour	Worse than average crime score in CWI and feeling of safety outside during the day, amongst ten worst wards for feeling of safety outside during the night. Worse than average for all crime offences, and amongst ten worst wards for antisocial behaviour and violent crime
Infrastructure	Better than average housing score in CWI

Langley, Eastbourne



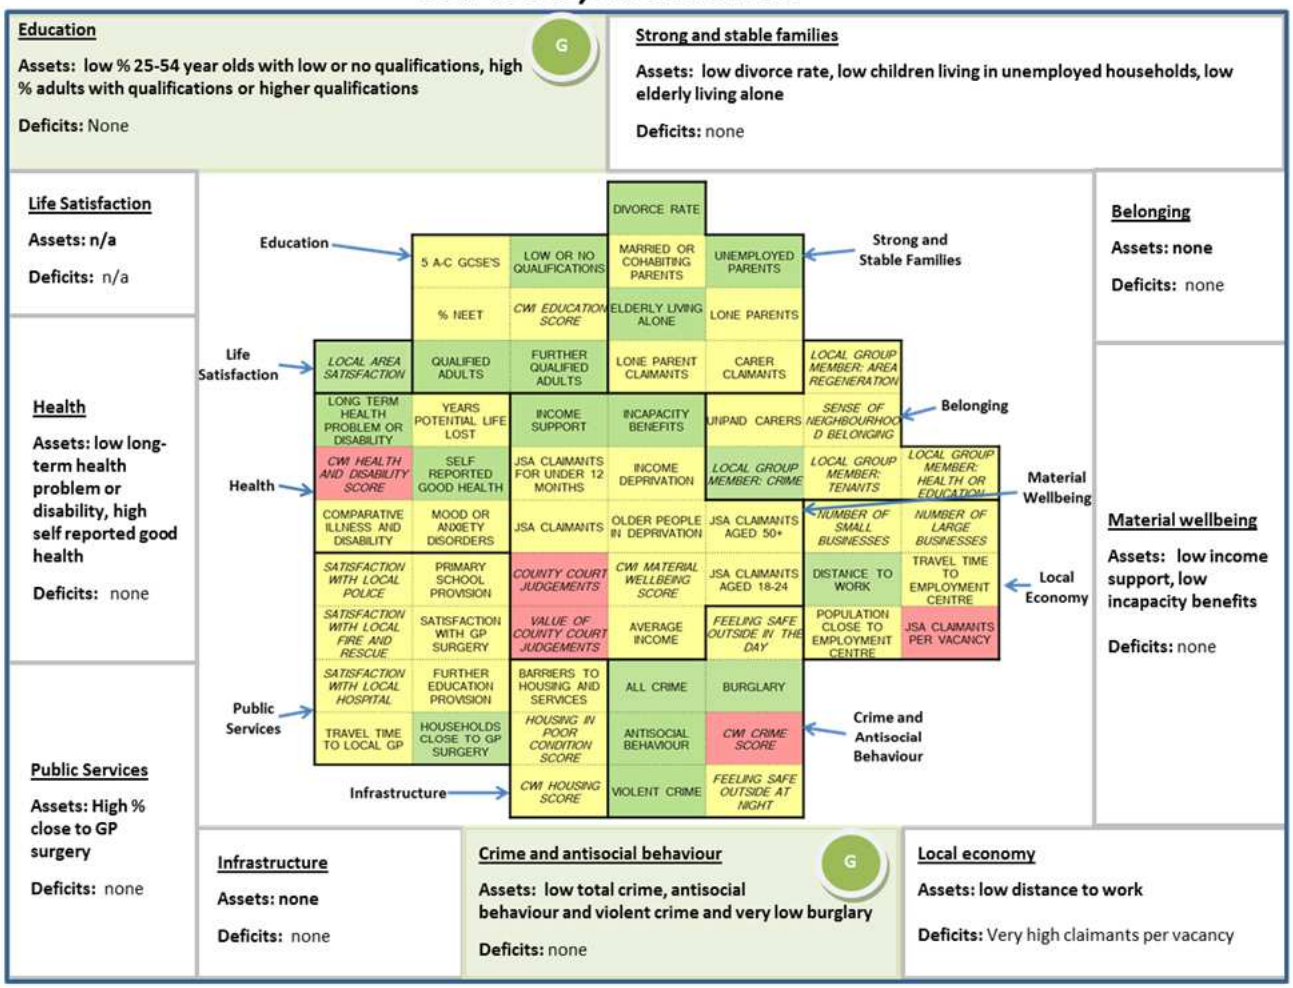
Component	Description
Life satisfaction	
Education	Worse than average % of 25-54 year olds with low or no qualifications, and 16-18 year olds who are NEET, amongst worst ten wards for working age qualifications at level 2 or above and third worst ward for qualifications at level 4 or above, below average educational scores in the CWI
Health	Worse than average potential years of life lost, amongst worst ten wards for health and disability score in CWI, worse than average self reported good health, comparative illness and disability, and mood or anxiety disorders in adults
Material wellbeing	Worse than average % on income support, and incapacity benefits, worse than average income deprivation, worse than average CWI material wellbeing score and income deprivation affecting older people, second worst ward for number of county court judgements, and worse than average value of county court judgements
Strong and stable families	Worse than average % of people who are divorced and % children living in workless households, better than average % of elderly people living alone. Worse than average children living in married or cohabiting households or in lone parent households. Better than average number of carer claimants
Belonging	
Local economy	Worse than average number of small local businesses and distance travelled to work
Public services	Better than average walking/public transport travel time to GP surgery, worse than average further education institutions within 30 mins walking/public transport but better than average primary school within 15 mins by walking/public transport
Crime and antisocial behaviour	Third worst ward for crime score in CWI, and amongst ten worst for feeling of safety outside during the day. Better than average for burglary but worse than average antisocial behaviour
Infrastructure	Better than average barriers to housing and services score and housing score in CWI. Third worst ward for housing in poor condition score

Meads, Eastbourne



Component	Description
Life satisfaction	Better than average satisfaction with local area
Education	Better than average 25-54 year olds with low or no qualifications, better than average 16-18 year olds who are NEET, better than average adults with qualifications at level 2 or above and at level 4 or above, above average educational scores in the CWI
Health	worse than average with limiting long term health problem or disability, amongst ten worst wards for average potential years of life lost, worse than average self reported good health, worse than average mood or anxiety disorders in adults
Material wellbeing	Better than average % on income support, worse than average JSA claimants, better than average JSA claimants aged over 50 years but worse than average JSA claimants aged 18-24, worse than average number of county court judgements and second worst ward for value of county court judgements
Strong and stable families	Ranked 2nd worst ward for elderly people living alone, worse than average for lone parent households, better than average for lone parent claimants, amongst ten worst wards for carer claimants
Belonging	in worst 10 wards for sense of neighbourhood belonging and % unpaid carers, top ranking ward for membership of local tenants group
Local economy	Better than average walking/public transport travel time to employment centre. Best ranking ward for both number of small and number of large local businesses, better than average claimants per job vacancy and amongst ten best wards for distance travelled to work
Public services	Worse than average further education institutions within 30 mins walking/public transport
Crime and antisocial behaviour	Amongst ten best wards for crime score in CWI. Amongst ten worst wards for all crime offences and burglary, worse than average antisocial behaviour and fourth worst ward for violent crime
Infrastructure	Better than average barriers to housing and services score and housing in poor condition score, amongst ten best wards for housing score in CWI

Old Town, Eastbourne



Component	Description
Life satisfaction	Better than average satisfaction with local area
Education	Better than average 25-54 year olds with low or no qualifications, better than average for adults with qualifications at level 2 or above or at level 4 or above
Health	Better than average limiting long term health problem or disability, worse than average health and disability score (CWI), better than average self reported good health
Material wellbeing	Better than average income support and incapacity benefits, worse than average county court judgements and fourth worst value of county court judgements
Strong and stable families	Better than average % of people who are divorced, children living in workless households and elderly people living alone
Belonging	Better than average membership of local group addressing crime
Local economy	Second worst ward for claimants per job vacancy but better than average distance travelled to work
Public services	Better than average % of households within 15 mins of GP surgery by walking/public transport
Crime and antisocial behaviour	Worse than average crime score in CWI. Better than average for all crime offences, antisocial behaviour and violent crime, and amongst ten best wards for burglary
Infrastructure

Local economy

Assets: none

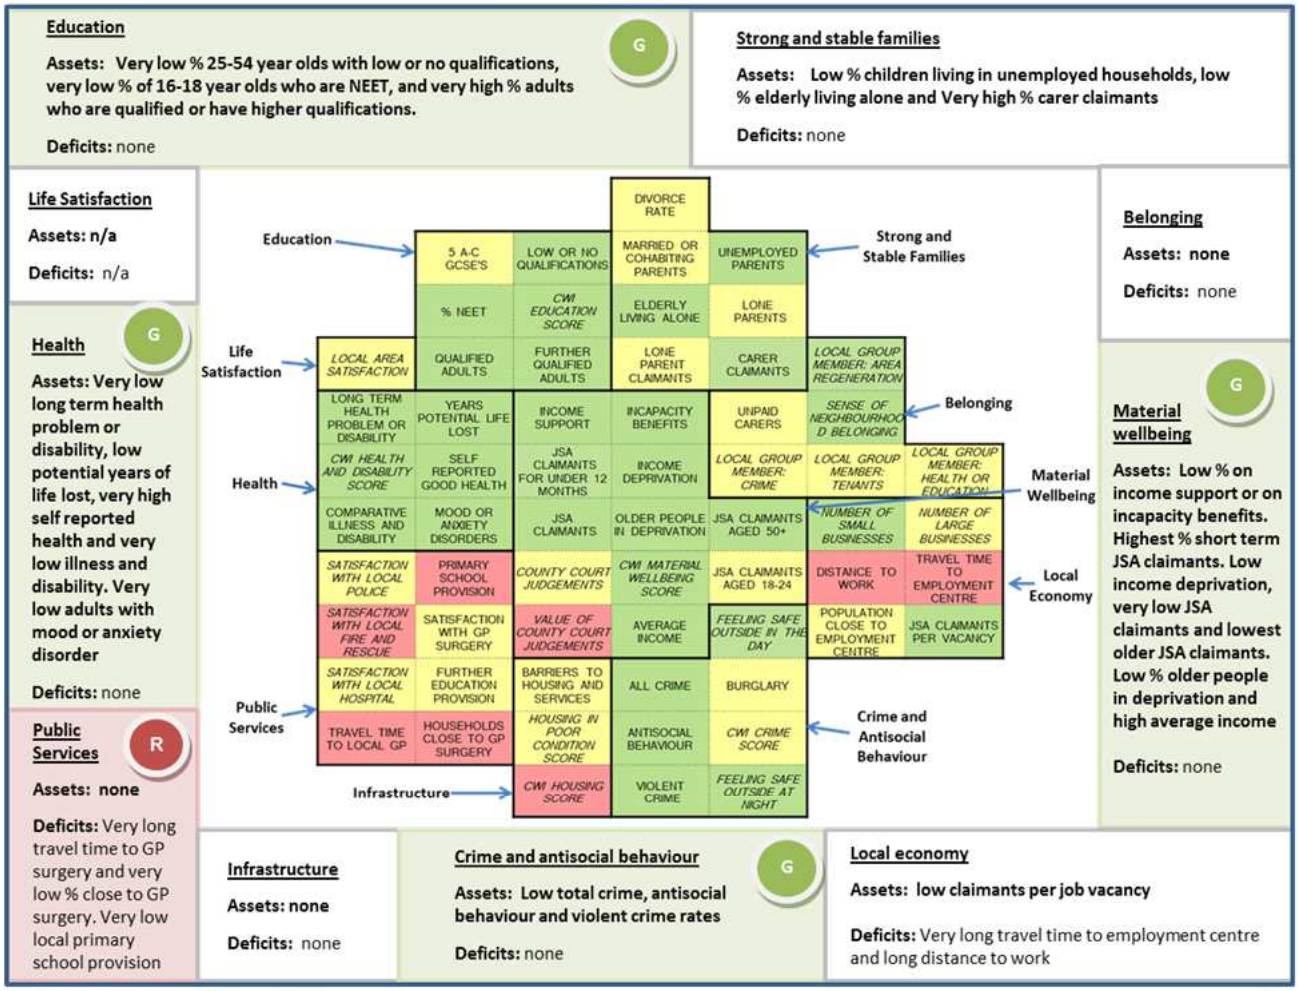
Deficits: very high travel time to employment centre, very low % close to employment centre, high claimants per job vacancy, highest average distance to work

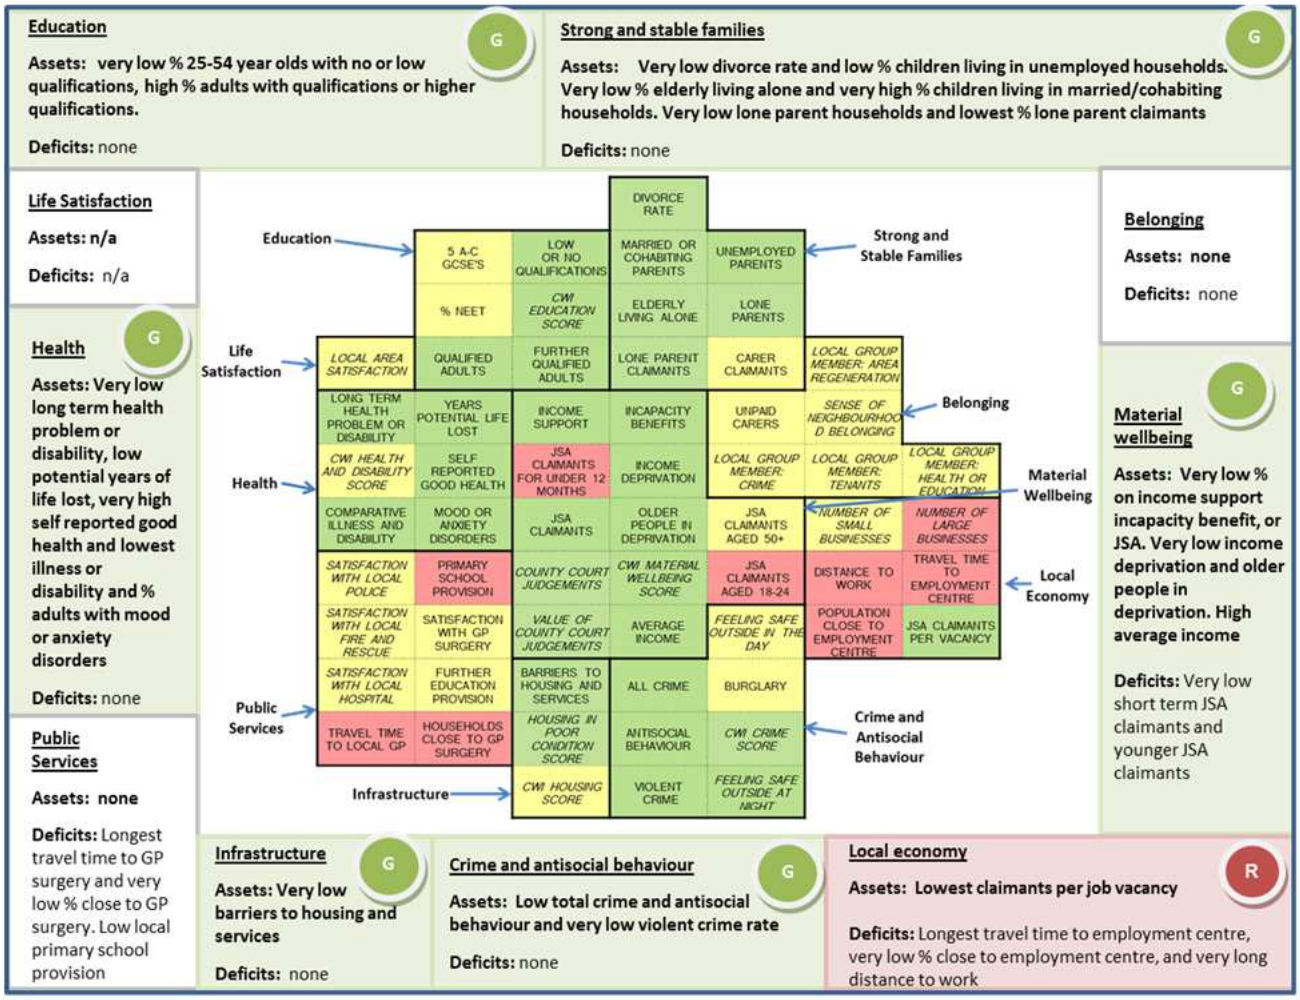
Component	Description
Life satisfaction	
Education	Better than average for 25-54 year olds with low or no qualifications, amongst the best 10 wards for % with qualifications at level 2 or above, and second best for qualifications at level 4 or above, better than average for educational scores in the CWI
Health	Amongst the best 10 wards for average for potential years of life lost, better than average self reported good health, comparative illness and disability, and mood or anxiety disorders in adults
Material wellbeing	Best ranking ward for % on income support, amongst the best 10 wards for incapacity benefits, amongst the worst 10 wards for JSA claimants claiming for less than 12 months, best ranking ward for income deprivation, better than average % JSA claimants, second best ward for income deprivation affecting older people and for value of county court judgements, amongst the best 10 wards for number of county court judgements, and fifth best ward for average household income
Strong and stable families	Better than average % of people who are divorced and children living in workless households, better than average % children living in married or cohabiting households or in lone parent households
Belonging	Fifth best ward for sense of neighbourhood belonging, third best ward for % unpaid carers
Local economy	Second worst ward for walking/public transport travel time to employment centre and third worst for % of working age population within 20 mins of employment centre by walking/public transport or cycling, worse than average for number of small local businesses, and for claimants per job vacancy, worst ranking ward for distance travelled to work
Public services	Better than average walking/public transport travel time to GP surgery, best ranking ward for % households within 15 mins of GP surgery by walking/public transport. Amongst ten worst wards for primary schools within 15 mins by walking/ public transport
Crime and antisocial behaviour	Better than average crime score in CWI, ranked the best ward for feeling of safety outside during the night, better than average for all crime offences and for antisocial behaviour, amongst the best 10 wards for violent crime
Infrastructure	Amongst the best 10 wards for barriers to housing and services score

Forest Row, Wealden



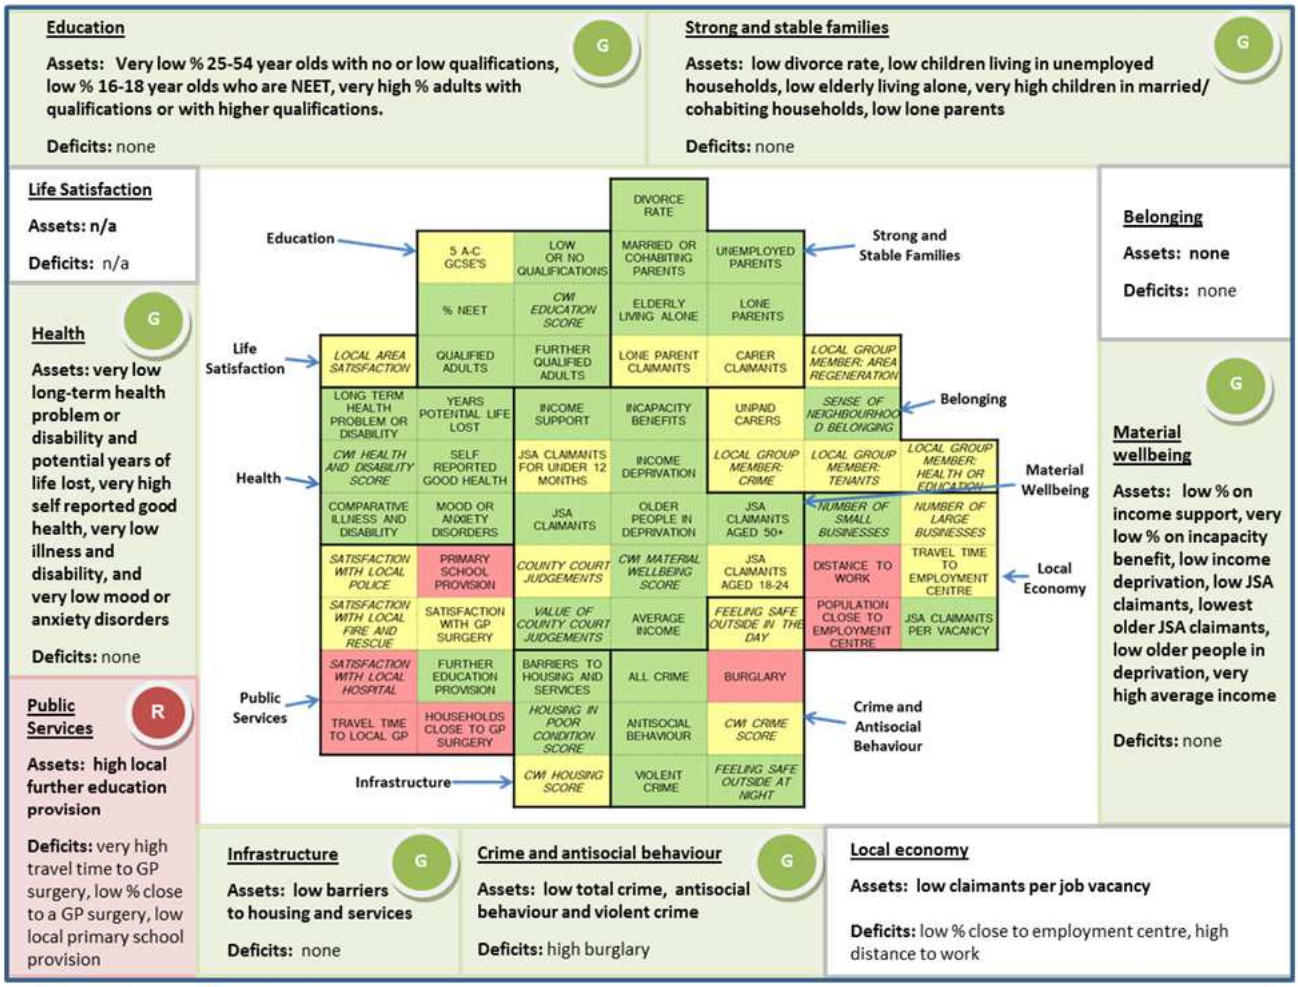
Component	Description
Life satisfaction	
Education	Amongst the ten best wards for 25-54 year olds with low or no qualifications, 16-18 year olds who are NEET, qualifications at level 2 or above and at level 4 or above. Better than average educational scores in the CWI
Health	Fourth best ranked ward for limiting long term health problem or disability better than average potential years of life lost, amongst the ten best wards for health and disability score in CWI, Second best ranked ward for self reported good health and for comparative illness and disability, amongst ten best wards for mood or anxiety disorders in adults
Material wellbeing	Better than average % on income support or incapacity benefits. Best ranking ward for % JSA claimants claiming for less than 12 months, better than average income deprivation, Fourth best ranked ward for % JSA claimants and best ranking ward for JSA claimants aged over 50 years. Better than average CWI material wellbeing scores and income deprivation affecting older people. Worst ranked ward for value of county court judgements. Better than average household income
Strong and stable families	Better than average % children living in workless households and % elderly people living alone. Fourth best ranked ward for carer claimants
Belonging	Amongst ten best wards for sense of neighbourhood belonging and second best ward for membership of local regeneration group
Local economy	Fifth worst ward for walking/public transport travel time to employment centre. Amongst ten best wards for number of small local businesses. Better than average claimants per job vacancy and worse than average distance travelled to work
Public services	Amongst ten worst wards for satisfaction with local fire & rescue services, second worst ward for walking/public transport travel time to GP surgery and fourth worst for % of households within 15 mins of GP surgery by walking/public transport. Amongst ten worst wards for primary schools within 15 mins by walking/ public transport
Crime and antisocial behaviour	Third best ranked ward for feeling of safety outside during the day and better than average feeling of safety outside during the night. Better than average all crime offences, antisocial behaviour and violent crime
Infrastructure	Worse than average housing score in CWI

Framfield, Wealden



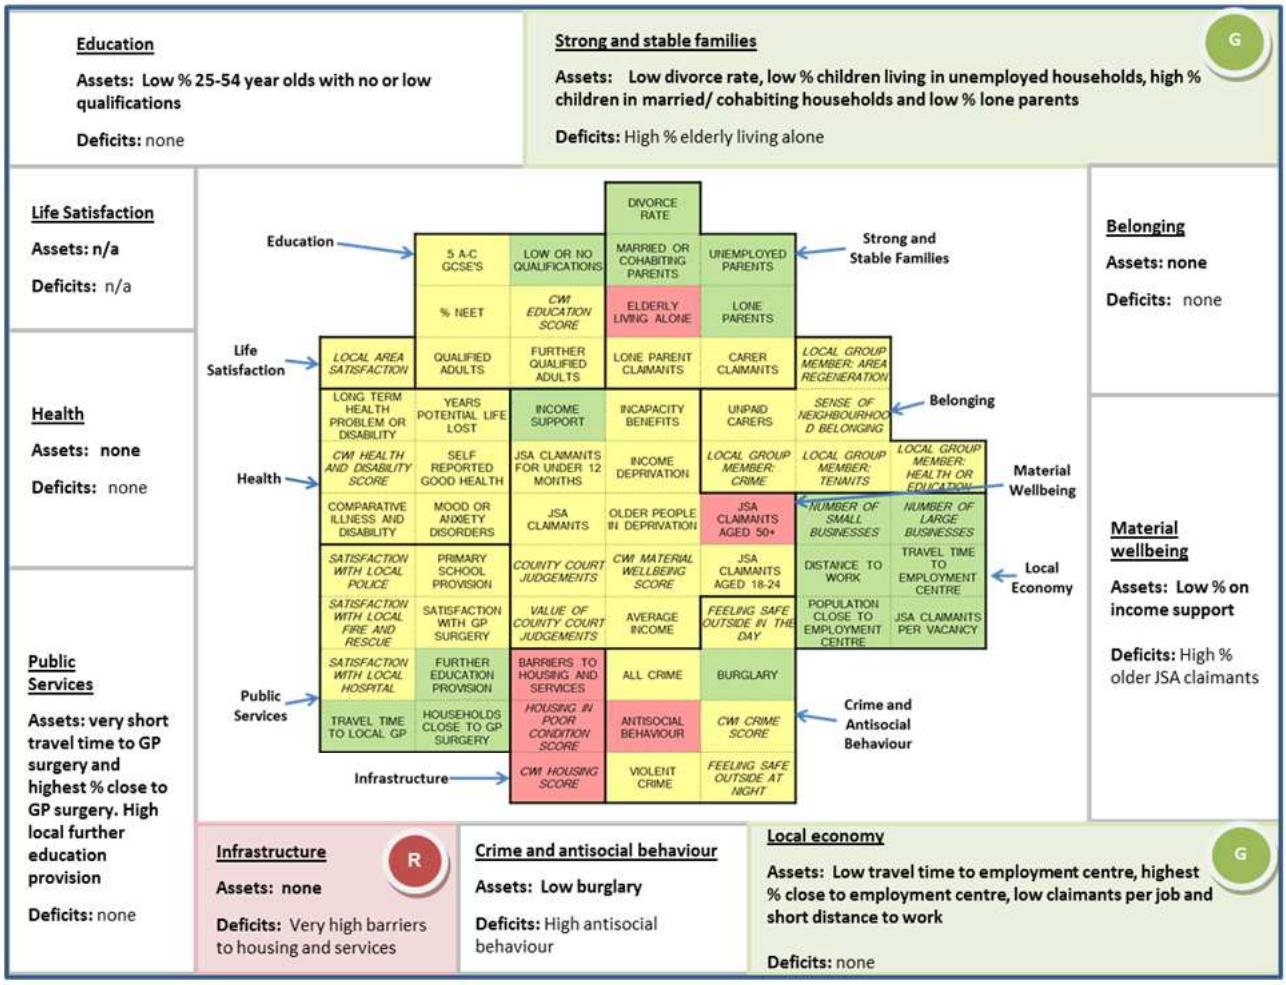
Component	Description
Life satisfaction	
Education	Second best ranked ward for 25-54 year olds with low or no qualifications. Better than average qualifications at level 2 or above or at level 4 or above. Fifth best ward for educational scores in the CWI
Health	Second best ranking ward for limiting long term health problem or disability, better than average potential years of life lost and amongst ten best wards for self reported good health. Best ranking ward for comparative illness and disability and mood or anxiety disorders in adults
Material wellbeing	Third best ward for % on income support, amongst ten best wards for incapacity benefits, JSA claimants and for JSA claimants claiming for less than 12 months. Amongst ten best wards for income deprivation but third worst ward for JSA claimants aged 18-24. Amongst ten best wards for CWI material wellbeing scores and fifth best ward for income deprivation affecting older people. Amongst ten best wards for number of county court judgements and better than average value of county court judgements and household income
Strong and stable families	Amongst ten best wards for % of people who are divorced, better than average % children living in workless households, amongst ten best wards for elderly people living alone and children living in married or cohabiting households. Fifth best ward for children living in lone parent households and best ranking ward for lone parent claimants
Belonging	
Local economy	Worst ranking ward for walking/public transport travel time to employment centre, amongst ten worst wards for % of working age population within 20 mins of employment centre by walking/public transport or cycling, worse than average number of large local businesses. Best ranking ward for claimants per job vacancy but amongst ten worst wards for distance travelled to work
Public services	Worst ranking ward for walking/public transport travel time to GP surgery and amongst ten worst wards for % of households within 15 mins of GP surgery by walking/public transport. Worse than average primary schools within 15 mins by walking/public transport
Crime and antisocial behaviour	Better than average crime score in CWI and fourth best ward for feeling of safety outside during the night. Better than average all crime offences and antisocial behaviour. Amongst ten best wards for violent crime rate
Infrastructure	Second best ranking ward for barriers to housing and services score and better than average housing in poor condition score

Frant and Withyham, Wealden



Component	Description
Life satisfaction	
Education	Third best ward for 25-54 year olds with low or no qualifications. Better than average % 16-18 year olds who are NEET, second best ward for qualifications at level 2 or above and amongst ten best for qualifications at level 4 or above. Amongst the best 10 wards for educational scores in the CWI
Health	Fifth best ward for limiting long term health problem or disability, and third best for potential years of life lost, better than average health and disability score in CWI, fourth best ward for self reported good health, amongst the best 10 wards for comparative illness and disability, and fifth best for mood or anxiety disorders in adults
Material wellbeing	Better than average income support, amongst the best 10 wards for incapacity benefits, better than average income deprivation and JSA claimants, and best ranking ward for JSA claimants aged over 50 years, better than average CWI material wellbeing scores, income deprivation affecting older people, and value of county court judgements, third best ward for average household income
Strong and stable families	Better than average % of people who are divorced, % children living in workless households, and % elderly people living alone, amongst the best 10 wards for children living in married or cohabiting households, better than average for children living in lone parent households
Belonging	Better than average sense of neighbourhood belonging
Local economy	Worse than average % of working age population within 20 mins of employment centre by walking/public transport or cycling, amongst the best 10 wards for number of small local businesses, better than average claimants per job vacancy, worse than average distance travelled to work
Public services	Amongst the worst 10 wards for satisfaction with local hospital, worse than average walking/public transport travel time to GP surgery , worse than average % of households within 15 mins of GP surgery by walking/public transport, better than average further education institutions within 30 mins walking/public transport, worse than average primary schools within 15 mins by walking/public transport
Crime and antisocial behaviour	Better than average feeling of safety outside during the night, better than average all crime offences, antisocial behaviour and violent crime, worse than average for burglary
Infrastructure	Amongst the 10 best wards for barriers to housing and services score, better than average housing in poor condition score

Hailsham Central and North, Wealden



Component	Description
Life satisfaction	
Education	Better than average 25-54 year olds with low or no qualifications
Health	
Material wellbeing	Better than average % on income support but worse than average JSA claimants aged over 50 years
Strong and stable families	Better than average % of people who are divorced and children living in workless households. Worse than average elderly people living alone. Better than average children living in married or cohabiting households or in lone parent households
Belonging	
Local economy	Better than average walking/public transport travel time to employment centre, best ranking ward for % of working age population within 20 mins of employment centre by walking /public transport or cycling, better than average number of small local businesses and amongst ten best wards for large local businesses, better than average claimants per job vacancy and distance travelled to work
Public services	Amongst ten best wards for walking/ public transport travel time to GP surgery, best ranking ward for % of households within 15 mins of GP surgery by walking/public transport. Better than average further education institutions within 30 mins walking/public transport
Crime and antisocial behaviour	Better than average burglary rate but worse than average antisocial behaviour
Infrastructure	Fourth worst ward for barriers to housing and services score, worse than average housing score in CWI and housing in poor condition score

Hailsham East, Wealden

Education

Assets: none

Deficits: very low GCSE rates and very high % 25-54 year olds with low or no qualifications. Highest % 16-18 year olds who are NEET. Very low % adults with qualifications or higher qualifications

Strong and stable families

Assets: none

Deficits: High divorce rate, very high % children living in unemployed households. Low % children in married/ cohabiting households and high % lone parents. Very high % lone parent claimants
